AUDIT

Usability

3 issues · 0 critical · 1 major · 2 minor · 0 suggestion

The login page employs a minimalist neumorphic design that is visually clean but compromises functional clarity. The primary 'Sign In' action lacks sufficient visual prominence and affordance, while the overall layout within the central card feels vertically unbalanced.

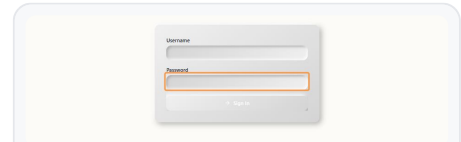

Affordance 1

1. The 'Sign In' button relies on subtle neumorphic shadows and a light-on-light color scheme, causing it to blend into the background. It lacks the traditional signifiers of a primary action button, such as a distinct fill color or a clear border, which can lead users to perceive it as a disabled element or a non-interactive surface.

Major

| "Sign In"**TRY**

Apply a solid, high-contrast background color to the 'Sign In' button to clearly distinguish it as the primary call to action.

Spacing & alignment 1

2. The vertical spacing within the login card is unbalanced. The 'Sign In' button is positioned uncomfortably close to the bottom edge of the container, while there is significantly more breathing room at the top above the 'Username' label.

Minor

| "Sign In"**TRY**

Increase the bottom padding of the card container to create a more symmetrical and balanced vertical layout.

Hierarchy

1

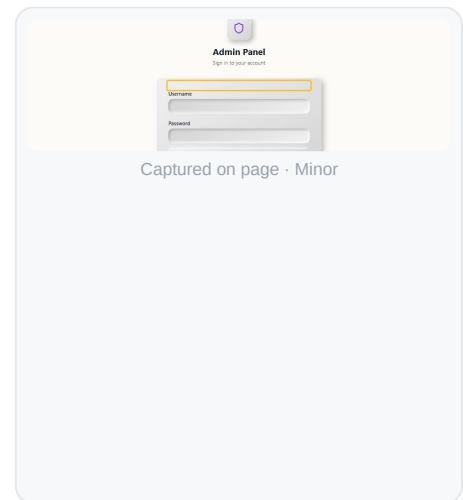

3. The visual hierarchy of the form is inverted; the field labels ('Username', 'Password') have higher visual weight and contrast than the primary 'Sign In' action. Additionally, the deep inset shadows of the input fields create more visual interest than the relatively flat-looking button, drawing the eye away from the final task.

Minor

| *"Username"*

TRY

Increase the visual prominence of the 'Sign In' button text and icon, and ensure the button itself is the most visually 'heavy' element in the region.
