AUDIT

Usability

14 issues · 0 critical · 3 major · 9 minor · 2 suggestion

The page presents a clean, professional aesthetic with a clear primary CTA and effective use of whitespace. However, the visual hierarchy is weakened by redundant content in the hero section, and the layout balance suffers in the "Why Hire Me" section due to an orphaned grid item. Minor styling inconsistencies in the footer also detract from the overall polish.

Hierarchy

1

1. The three feature cards in the hero section (top right) repeat the exact same value propositions found in the 'Why Hire Me' section below. This creates unnecessary visual noise in the hero and makes the subsequent section feel redundant rather than additive.

Major

"Professional Legal Practice"

TRY

Remove the cards from the hero section to allow the primary text and CTAs to stand out, or replace them with unique high-level metrics or social proof.

Spacing & alignment

6

2. The stack of feature cards on the right is vertically misaligned with the primary hero content. The cards start significantly lower than the H1 heading, aligning instead with the middle of the body paragraph, which creates a disjointed and 'sagging' visual effect for the right column.

Major

"Professional Legal Practice"

TRY

Shift the card container upward so the top of the first card aligns with the top of the H1 'Vijay Kumar Sharma' to create a stronger horizontal anchor.

3. The 5-card layout on a 3-column grid leaves a large visual 'hole' in the bottom-right corner. This creates a heavy imbalance that makes the section feel unfinished or poorly planned.

Major

"Why Hire Me"

TRY

Center the two cards in the bottom row to create a balanced, symmetrical arrangement (3 on top, 2 centered below).

4. The text in the 'Trust' column is indented due to the bullet points, whereas the text in all other columns is flush with the headings. This breaks the vertical alignment rhythm across the footer.

Minor

"Trust"

TRY

Align the list items flush with the 'Trust' heading to match the alignment of the 'Quick Links' and 'Services' columns.

5. The horizontal spacing between the four footer columns is uneven; the gap between the first and second columns is significantly tighter than the gap between the third and fourth.

Minor

"Services"

TRY

Use a consistent gutter width or flexbox distribution to ensure even horizontal spacing between all columns.

6. The 'Why Hire Me' section uses a three-column grid for five items, resulting in a bottom row with a large empty space on the right. This creates an unbalanced, 'heavy' left-aligned feel that breaks the symmetry of the page.

Minor

“Timely Delivery”

TRY

Center the two items in the bottom row or use a different layout (e.g., a 2-3 staggered grid) to maintain visual balance.

Captured on page · Minor

7. The feature cards are unnecessarily wide for the short text strings they contain. This results in excessive internal whitespace that makes the right side of the hero feel visually sparse and inefficiently utilized compared to the dense information on the left.

Suggestion

“NDA by Default”

TRY

Reduce the maximum width of the cards to better wrap the content, or add a brief line of descriptive sub-text to each card to justify the large footprint.

Typography 2

8. Long all-caps text

Minor

17 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

9. Long all-caps text

Minor

50 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

Layout 1

10. Heading level skipped

Minor

H1 to H3

TRY

Use the next heading level down (or style the correct level with CSS) instead of skipping.

This is an H3 but the previous heading was H1. Skipping levels breaks the document outline.

Consistency 2

11. The 'TRUST' column in the footer uses bullet points for its list items, while the 'QUICK LINKS', 'SERVICES', and 'CONTACT' columns do not. This inconsistency makes the footer feel slightly unpolished and breaks the established pattern.

Minor

“NDA by Default”

TRY

Remove the bullet points from the 'TRUST' column to match the clean, text-only styling of the adjacent lists.

12. The lightning bolt icon is used for both 'Interdisciplinary Approach' and 'Timely Delivery.' Reusing the same icon for different concepts undermines their utility as unique visual identifiers.

Minor

“Timely Delivery”

TRY

Assign a unique icon to 'Timely Delivery,' such as a clock or stopwatch, to distinguish it from other categories.

Affordance 1

13. The 'Get in Touch' button has very low visual prominence. Its pale background and thin border make it look more like a static tag or a disabled state than a secondary interactive element, especially when compared to the vibrant primary CTA.

Minor

"Get in Touch"

TRY

Increase the border contrast or use a slightly more saturated background color to clearly signify its clickability as a secondary action.

Grouping 1

14. The vertical gap between the column headings and the first item in each list is visually cramped, making the heading feel less like a distinct label for the group.

Suggestion

"Quick Links"

TRY

Increase the bottom margin of the footer headings to provide more breathing room between the labels and the list content.
