AUDIT

Usability

9 issues · 0 critical · 2 major · 7 minor · 0 suggestion

The interface employs a soft, neumorphic design language that provides a clean aesthetic but results in weak interactive affordances and inconsistent control styling. Key usability concerns include the lack of clear navigation state indicators and significant inconsistencies in the layout and iconography of identical 'Add' actions across different sections.

Affordance 1

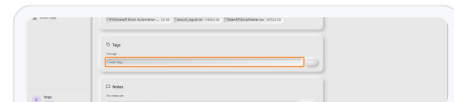

1. The input fields for adding tags and notes are visually recessed and very thin, causing them to look like decorative containers or progress bars rather than interactive text fields.

Major

1177

TRY

Increase the vertical height of the input fields and use more standard border or shadow treatments to signify editability.

State & feedback 1

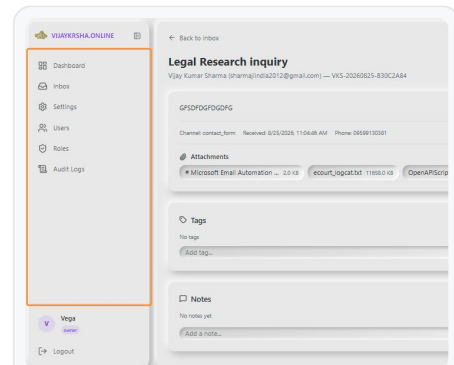

2. There is no visual indicator (such as a background highlight, high-contrast text, or a side-border) to identify which navigation item is currently active. This forces users to rely on memory or the URL to know where they are in the system.

Major

"DashboardInboxSettingsUsersRolesAudit L..."

TRY

Apply a distinct visual style to the active navigation link, such as a light background tint or a vertical accent bar on the left edge.

Typography 2

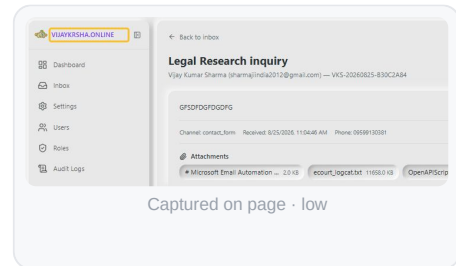

3. Long all-caps text

Minor

17 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

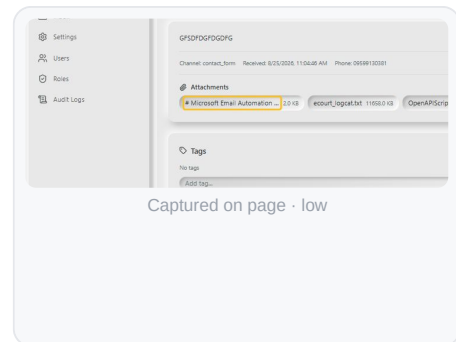

4. Text is truncated

Minor

Content clipped (ellipsis)

TRY

Widen the container, shorten the copy, or wrap to more lines so the full text is visible.

This text is clipped with an ellipsis because it does not fit its container, so part of the content is hidden.

Layout 1

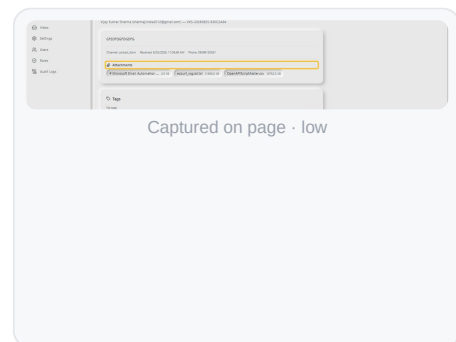

5. Heading level skipped

Minor

H1 to H3

TRY

Use the next heading level down (or style the correct level with CSS) instead of skipping.

This is an H3 but the previous heading was H1. Skipping levels breaks the document outline.

Spacing & alignment 2

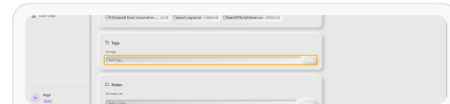

6. The 'Add' buttons and the right edges of the input fields in the Tags and Notes sections are not vertically aligned, creating a jagged and unpolished visual edge on the right side of the layout.

Minor

“Add”

TRY

Align the right-hand controls to a consistent vertical grid line across all cards.

Captured on page · Minor

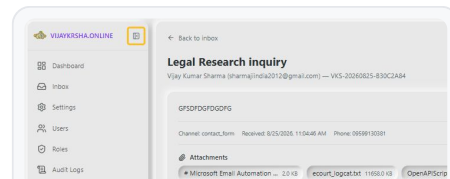

7. The sidebar collapse button is tucked too tightly into the top-right corner, lacking sufficient breathing room relative to the sidebar's outer edges and the header text.

Minor

“”

TRY

Increase the top and right margins for the collapse button to create a more balanced and intentional layout.

Captured on page · Minor

Consistency 1

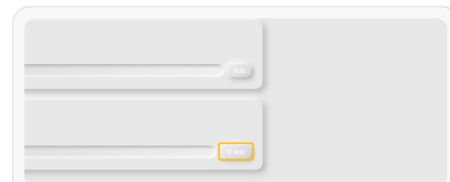

8. The 'Add' buttons for Tags and Notes are styled inconsistently; the Notes button includes an icon and is wider, while the Tags button is text-only, despite performing the same functional role.

Minor

“Add”

TRY

Standardize the button width and iconography for all 'Add' actions within the content cards.

Imagery & icons 1

9. The 'Add' button in the Notes section uses a paper plane icon, which conventionally signifies 'Send' or 'Submit' for communications, creating a mismatch with the action of adding a local note.

Minor

“Add”

TRY

Replace the paper plane icon with a plus (+) icon or a more relevant 'note' icon.
